Liquorice

since sun damage is a primary cause of discoloration of the skin, Liquorice also contains UV blocking enzymes that help protect you from future damage

Ficus Skin hydration

Wheat grain Antioxidant

Aloe Vera Soothe sunburn, Relieve skin irritation ,
Add moisture

- ❖ Suncare cream absorbs or reflects some of the sun's ultraviolet (UV) radiation and thus helps protect against sunburn.
- ❖ Carrot will contribute to a healthy complexion.
- ❖ Vitamin A helps repair skin tissue and protects against the sun's harsh rays.
- ❖ The potassium in carrot reduces skin dryness as well as scars and blemishes by helping with hydration.
- ❖ Carrot used in skin creams to nourish, tighten, revitalize, and rejuvenate skin. It visibly improves skin tone, elasticity, and general skin health.
- ❖ It is claimed to slow the progression of visible wrinkles. It is calming and appropriate for irritated skin.
- ❖ Sun care products containing naturally extracted Carrot Oil quickly produce a beautiful golden tan and better protect the skin against the damaging effects of UVR than chemical sunscreens alone.
